

Apk Selection for BenQ Boards

Any third party apk can be installed on a BenQ Interactive Flat Panel. There are a few different conditions that must be met to achieve a successful installation. Here are two different sites where apps can be downloaded.

<https://www.apkmirror.com/>

<https://m.apkpure.com/>

You can also consult this shared folder and see if the app you are looking for is available. The versions found in this folder are not necessarily up to date but have been tested by our team.

[BenQ Tested APK's](#)

When you find the desired app that you wish to install, please consult the different build variants to find the one that is compatible with your board. The specs for each one of the BenQ Boards series can be found below. The app must be in the .apk format to ensure a successful installation. Xapk and Package format are not compatible with the BenQ boards.
